

# Bouncer v2.0 Feature List

## BouncerApp Features

Feature	Description
Swipe ID's	Swipe the magnetic strip on a US Driver's License (Requires Linea Pro v4)
Scan ID's	Scan the 2D barcode on the back of a US Driver's License (Requires Linea Pro v4 2D)
Age Verification	Verify that the age electronically encoded on the US Driver's License matches the age printed on the front of the card. Bouncer will automatically flag ID's where the age is less than the minimum age specified in your BouncerApp settings.
Instant Scanning	Swipe or Scan ID's at any time, from anywhere in the App.
Easy to Read Status Indicator	Status is automatically displayed when you scan or swipe an ID, giving your bouncer a quick, at-a-glance indication of whether or not the ID is valid and acceptable for entry.
Color Coded Status	<ul style="list-style-type: none"> <li>Red: Underage, Expired ID, Invalid ID, Banned Person</li> <li>Yellow: Re-entering with the same ID</li> <li>Green: Valid ID and above the Minimum Age</li> </ul>
Age	Displays Age and DOB in over-sized, easy to read font
ID Info	Displays State, ID #, and Expiration Date
Guest Info	Displays Guest name and gender
Physical Description	Displays Guest's height, weight, hair color and eye color. Note: not all states encode all of this information. Any information electronically encoded on the ID will be displayed by BouncerApp.
Track Occupancy and Cover Charge Collection	Track guests as they enter & leave to track your current guest count as compared to your legal occupancy. Gather statistics about your nightly guest count.
Easy to read occupancy indicator	Over-sized numbers and bar graphic show your current guest count and how close you are to your legal occupancy limit.
Track Re-Entries	Track the number of unique guests versus re-entries so that you can calculate the number of unique guests and compare that to the door charge collected.
Set or Change Occupancy Limits	Configure your occupancy limits
Manage Guest Lists	Manage guest lists to alert your door staff when VIP's, Employees, Banned Customers, etc are scanned. Guest Lists and notifications are completely configurable.
Alert Door Staff with Custom Messages	For each guest list, you can define a custom message that is displayed when an ID is scanned which matches a member of a guest list. This custom message can alert the door staff on appropriate actions to take for this guest – such as “VIP – Free Entry”, “Employee – Full Access”, “Banned – DO NOT ENTER”.
Entry Status	For each guest list, you can define an entry status of “Entry Allowed” [Green], “Warn on Entry” [Yellow], or “Entry Denied” [Red] which will alert your door staff when an ID is scanned which matches a member of the guest list.
Match by ID or Name	For each guest list, you can define whether Bouncer detects matches by ID, Name or Both. If you choose Match By ID, Bouncer will detect guest list memberships by matching the ID number to any ID in the guest list. If you choose Match by Name, Bouncer will detect guest list membership by matching the Last Name on the ID to the Last Name of any guests in the guest list, and the First Name on the ID must start with the First Name in the Guest List.
Customizable	Bouncer is fully customizable to match your needs
Minimum Age	Set the minimum age for your establishment
Occupancy	Set your legal occupancy
Slider/Button	Specify whether you prefer Slider Controls (prevent mistakes) versus Buttons (faster) on the main Counter / Scanner screens

Data Retention Policy	Configure how much data is retained by Bouncer and how long the data is retained. Bouncer will automatically record demographic data about your guests, including Age, Gender and Zip Code. In addition to this basic demographic data, you can instruct Bouncer to store your guests Name, Address and Physical Description.
Guest Lists	Create your own custom guest lists.
Guest List Report	Generate a report containing a list of all of the members of a Guest List.

## BouncerOnline Features

Share Data Between Multiple Devices	Data between multiple devices is automatically kept in sync via your BouncerOnline Account. This allows you to track your total occupancy across multiple entry locations using multiple BouncerApp devices. As guests enter/leave through any door, your overall guest count is kept in sync by BouncerOnline.
View Entry Data	Search, sort and filter your Entry Data, allowing you to quickly and easily monitor compliance and find data including Re-Entries, Expired ID's, Underage ID's, and Un-Scanned Entries (guests allowed in without an ID check)
View Demographic Data	Sort and filter entry data by Age, Gender, Zip Code, etc.
Manage Guest Lists Online	Manage your guest lists without phone calls, paper guest lists, etc. Log into BouncerOnline and add someone to your guest list from any web browser – even from your phone.
Export to Excel	Export your entry data to MS Excel. Filter the data in BouncerOnline to export only the set of data that you're interested in.
Charts & Graphs	Display and print graphs showing vital business statistics, including Guest Counts, Demographic trends (age, gender, zip code, etc)
Retain data indefinitely	With BouncerOnline, you can retain your entry data indefinitely.
